

Alex Example

Platform Engineer · Linux · NixOS · Kubernetes

alex@example.invalid · github.com/example · Berlin, Germany

Demo CV — replace the identity, links, dates, and achievements before publishing.

Profile

Platform engineer with 8+ years of experience building reliable developer platforms, Linux infrastructure, and delivery automation. Enjoys turning undocumented operational knowledge into small, reproducible systems.

Experience

Senior Platform Engineer · Northstar Systems

2022–present · Berlin

- Maintained 120 Linux hosts with declarative configuration and automated rollbacks.
- Reduced median deployment time from 25 minutes to 7 minutes.
- Introduced ownership, runbooks, and SLO dashboards for 40 services.

Site Reliability Engineer · Acme Cloud

2019–2022 · Remote

- Built Kubernetes platform tooling used by 35 application teams.
- Designed backup and restore drills for PostgreSQL and object storage.
- Converted recurring incidents into automated checks.

Selected work

- **Reproducible workstation platform** — NixOS configuration shared across laptops and servers.
- **Deployment previews** — ephemeral environments created from pull requests.
- **Operational handbook** — searchable runbooks linked from alerts.

Skills

Linux, NixOS, Nix flakes, systemd, Kubernetes, Terraform, Ansible, Go, Python, PostgreSQL, Prometheus, Grafana, GitHub Actions, incident response.

Education

BSc Computer Science, Example University · 2016
