Demo CV — replace the identity, links, dates, and achievements before publishing.

Profile

Product-minded engineer who works across user interfaces, APIs, and delivery systems. Focused on making complex workflows understandable and shipping improvements that can be measured.

Experience

Product Engineer · Lantern Labs

2021–present · Amsterdam

- Delivered a self-service onboarding flow that increased activation by 18%.
- Turned repeated customer questions into product improvements with design and support.
- Established release checks that reduced regressions without slowing weekly delivery.

Software Engineer · Paperplane

2018–2021 · Utrecht

- Built customer-facing React and TypeScript features backed by Python APIs.
- Migrated critical background jobs to a retryable queue.
- Mentored engineers through pairing, design reviews, and documentation.

Selected work

- **Onboarding redesign** — instrumented the funnel and iterated with users.
- **Search relevance tools** — safe controls for correcting common search misses.
- **Developer portal** — local setup, ownership, and release workflows in one place.

Skills

TypeScript, React, HTML/CSS, Python, PostgreSQL, REST APIs, accessibility, product analytics, testing, CI/CD, technical writing.

Education

BSc Software Engineering, Example University · 2018
